DETAILED ACTION

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Information Disclosure Statement

2. Receipt is acknowledged of the Information Disclosure Statement (IDS) received June 28, 2006.

Specification

3. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

Double Patenting

4. Claims 1 and 10 are provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1 and 2 of copending Application No. 10/584,683. Although the conflicting claims are not identical, they are not patentably distinct from each other because both sets of claims require a rotating portion, a head portion, an actuator portion, a wiring body and a connection portion.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Allowable Subject Matter

5. Claims 1-14 are allowable over the prior art of record if a terminal disclaimer is filed with respect to co-pending application, 10/584,683.

6. The following is a statement of reasons for the indication of allowable subject matter:

The primary reason for allowance is the inclusion of

each of the shaft bearing portion of the actuator portion, the ramp portion and the circuit substrate portion has fastening portions on both sides thereof in a perpendicular direction to the recording medium, the actuator portion, the ramp portion and the circuit substrate portion being fixed to the upper side chassis and the lower side chassis.
